About this manual

• Illustrations used in this manual refer to the YAS-103. Instructions are common to both YAS-103 and YAS-93, except where otherwise specified, such as “YAS-103 only.”

Marks used in this manual

NOTE
This indicates precautions for use of the product and its feature limitations.

HINT
This indicates supplementary explanations for better use.
IMPORTANT SAFETY INSTRUCTIONS

1 Read these instructions.
2 Keep these instructions.
3 Heed all warnings.
4 Follow all instructions.
5 Do not use this apparatus near water.
6 Clean only with dry cloth.
7 Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8 Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11 Only use attachments/accessories specified by the manufacturer.
12 Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13 Unplug this apparatus during lightning storms or when unused for long periods of time.
14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

FCC INFORMATION (for US customers)

1 IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!
   This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.
2 IMPORTANT: When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product MUST be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.
3 NOTE: This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15, Section 15.105(b) and Part 15, Section 15.107(b), and has been certified by the manufacturer under FCC Registration No. __________ to comply with the requirements of those Regulations. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

4 Compliance with FCC regulations does not guarantee that interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit “OFF” and “ON”, please try to eliminate the problem by using one of the following measures:
5 Relocate either this product or the device that is being affected by the interference.
6 Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.
7 In the case of radio or TV interference, relocate/ reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to coaxial type cable.
8 If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Corporation of America A/V Division 6600 Orangethorpe Ave., Buena Park, CA 90620.
9 The above statements apply ONLY to those products distributed by Yamaha Corporation of America or its subsidiaries.

• This device complies with Part 15 of the FCC Rules and RSSGen of IC Rules.
• Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received including interference that may cause undesired operation.

See the “Troubleshooting” section at the end of this manual if interference to radio reception is suspected.

FCC WARNING

Change or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

NOTICE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC/IC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that it deemed to comply without maximum permittive exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 20 cm and more between the radiator and person’s body (excluding extremities: hands, wrists, feet and ankles). This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

FOR CANADIAN CUSTOMERS

To prevent electric shock, match wide blade of plug to wide slot and fully insert.
CAN ICES-3 (B)/NMB-3 (B)

Explanation of Graphical Symbols

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert you to the presence of un uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle, is intended to alert you to the presence of important operating and servicing (maintenance) instructions in the literature accompanying the appliance.

IMPORTANT

Please record the serial number of this unit in the space below.
MODEL: Serial No.: The serial number is located on the rear of the unit. Retain this Owner’s Manual in a safe place for future reference.

LISTENING FOR A LIFETIME

Yamaha and the Electronic Industries Association’s Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion – and, most importantly, without affecting your sensitive hearing. Since hearing damage from loud sounds is often undetectable until it is too late, Yamaha and the Electronic Industries Association’s Consumer Electronics Group recommend you to avoid prolonged exposure from excessive volume levels.
CAUTION: READ THIS BEFORE OPERATING YOUR UNIT.

- To assure the finest performance, please read this manual carefully.
- Keep it in a safe place for future reference.
- Install this unit in a well ventilated, cool, dry, clean place - away from direct sunlight, heat sources, vibration, dust, moisture, and/or cold. For proper ventilation, allow the following minimum clearances:
  Top: 10 cm (4 in), Rear: 10 cm (4 in), Sides: 10 cm (4 in)
- Locate this unit away from other electrical appliances, motors, or transformers to avoid hummin sounds.
- Do not expose this unit to sudden temperature changes from cold to hot, and do not locate this unit in an environment with high humidity (i.e. a room with a humidifier) to prevent condensation inside this unit, which may cause an electrical shock, fire, damage to this unit, and/or personal injury.
- Avoid installing this unit where foreign objects may fall onto this unit and/or this unit may be exposed to liquid dripping or splashing. On the top of this unit, do not place:
  - Other components, as they may cause damage and/or discoloration on the surface of this unit.
  - Burning objects (i.e. candles), as they may cause fire, damage to this unit, and/or personal injury.
  - Containers with liquid in them, as they may cause electrical shock to the user and/or damage to this unit.
- Do not cover this unit with a newspaper, tablecloth, curtain, etc. in order not to obstruct heat radiation. If the temperature inside this unit rises, it may cause fire, damage to this unit, and/or personal injury.
- Do not plug in this unit to a wall outlet until all connections are complete.
- Do not operate this unit upside-down. It may overheat, possibly causing damage.
- Do not use force on switches, knobs and/or cords.
- When disconnecting the power cable from the wall outlet, grasp the plug; do not pull the cable.
- Do not clean this unit with chemical solvents; this might damage the finish. Use a clean, dry cloth.
- Only voltage specified on this unit must be used. Using this unit with a higher voltage than specified is dangerous and may cause fire, damage to this unit, and/or personal injury. Yamaha will not be held responsible for any damage resulting from use of this unit with a voltage other than specified.
- To prevent damage by lightning, keep the power cable and outdoor antennas disconnected from a wall outlet or the unit during a lightning storm.
- Do not attempt to modify or fix this unit. Contact qualified Yamaha service personnel when any service is needed. The cabinet should never be opened for any reasons.
- When not planning to use this unit for long periods of time (i.e. vacation), disconnect the AC power plug from the wall outlet.
- Be sure to read the “Troubleshooting” section on common operating errors before concluding that this unit is faulty.
-前 moving this unit, press (2) to set this unit in the standby mode, and disconnect the power supply cable from the wall outlet.
- Condensation will form when the surrounding temperature changes suddenly. Disconnect the power supply cable from the outlet, then leave the unit alone.
- Install this unit near the wall outlet and where the AC power plug can be reached easily.
- Keep batteries away from children. If a battery is swallowed, contact your doctor immediately.
- Do not charge or disassemble the supplied batteries.
- Do not use different types of batteries (such as alkaline and manganese batteries) together. Read the packaging carefully as these different types of batteries may have the same shape and color.
- Exhausted batteries may leak. If the batteries have leaked, dispose of them immediately. Avoid touching the leaked material or letting it come into contact with clothing, etc. Clean the battery compartment thoroughly before installing new batteries.
- Do not throw away batteries with general house waste. Dispose of them correctly in accordance with your local regulations.
- Keep batteries away from children. If a battery is accidentally swallowed, contact your doctor immediately.
- Do not use this unit near medical devices or inside medical facilities.

YAS-103 only

- Radio waves may affect electro-medical devices. Do not use this unit near medical devices or inside medical facilities.

FOR U.K. CUSTOMERS

If the socket outlets in the home are not suitable for the plug supplied with this appliance, it should be cut off and an appropriate 3 pin plug fitted. For details, refer to the instructions described below.

NOTE

The plug severed from the mains lead must be destroyed, as a plug with bared flexible cord is hazardous if engaged in a live socket outlet.

SPECIAL INSTRUCTIONS FOR U.K. MODEL

IMPORTANT

THE WIRES IN THE MAINS LEAD ARE COLOURED IN ACCORDANCE WITH THE FOLLOWING CODE:

Blue: NEUTRAL
Brown: LIVE

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured BLACK. The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

Making sure that neither core is connected to the earth terminal of the three pin plug.
Supplied items

Make sure you have received all of the following items.

- Sound bar
- Remote control
- Battery x 2 (AAA, R03, UM4)
- Optical cable (1.5 m [4.9 ft])
- Mounting template
  * Using when attaching the sound bar to a wall
- Spacer x 2
  * Using when attaching the sound bar to a wall
Features

Enjoy powerful and realistic sound from the sound bar with built-in subwoofer, and easy installation and connection to a TV and other devices.

• AIR SURROUND XTREME

Enjoy 7.1 channel surround sound, which creates a wide and deep soundstage, as if speakers are set not only on the left and right, but also behind of the listener (p.9).

• Sophisticated sound technology

Enjoy powerful bass sound for the surround playback with the Yamaha original bass boost technology.

• Bluetooth® connection (YAS-103 only)

Content on a Bluetooth compatible smartphone, tablet, or computer can be played back easily (p.10). You can enjoy deep and fresh sound as close to the original by the Compressed Music Enhancer. Also, you can operate the sound bar easily using the dedicated controlling application “HOME THEATER CONTROLLER.”

• TV’s remote control learning function

Operate the sound bar with the TV’s remote control (p.12).

• TV Remote Repeater function

Enables the TV’s remote signal to path through the sound bar. If the installed sound bar blocks the TV’s remote sensor, the TV’s remote will not work. This function provides a convenient solution (p.14).

• Clear voice

Makes voice sound (such as dialogues and narrations) clear (p.9).

• UniVolume

Maintains consistent volume between channels, programs, commercials and sound sources (p.9).

Frequently asked questions

The following section covers popular functions and frequently asked questions about the sound bar.

Q1 Can I operate the sound bar using the remote control of the TV? Switching between the remote controls of the TV and sound bar is inconvenient.

A1 Yes. You can control the sound bar using your TV’s remote control by the “TV’s remote control learning” function (p.12).

This function is available only for the IR (infrared) remote control. Check your TV’s remote control type.

Q2 The TV’s remote control does not work after the sound bar is installed in front of the TV.

A2 The sound bar will transmit TV’s remote control signals by the “TV Remote Repeater” function (p.14).

This function is available only for the IR (infrared) remote control. Check your TV’s remote control type.

Q3 Can I make voice sound more clear?

A3 Yes. Dialogue in movies, TV news or sports programs, etc., can be made clearer using the “clear voice” function (p.9).

Q4 How do I connect the sound bar if the TV does not have an optical output?

A4 If the TV has analog audio outputs (red and white terminals), connect to ANALOG input of the sound bar with an RCA stereo cable (p.7). In this case, select ANALOG for the input source of the sound bar (p.8).

Q5 Can I set the sound bar to turn off automatically when I am not using it?

A5 Yes. Using the “auto power standby” function, the sound bar can be automatically turned off when it is not being used (p.14).
Part names and functions (sound bar)

Sound bar (front panel)

1 Indicators
   Indicate the status of the sound bar. The indicators will dim automatically if no operations are performed for 5 seconds. Refer to “Operations” (p.8 to 9) for the main functions of the indicators.

2 Remote control sensor
   Receives infrared signals from the remote control of the sound bar (p.8).

3 TV’s remote control sensor
   Receives infrared signals from the TV’s remote control when the TV Remote Repeater function is enabled (p.14).

4 INPUT key
   Selects an input source to be played back.

5 VOLUME (+/-) keys
   Adjust the volume (p.8).

6 (power) key
   Turns on or off (standby) the sound bar (p.9).

HINT
   • The sound bar may automatically turn off when the auto power standby function is enabled (p.14).

7 Speakers

Sound bar (rear panel)

8 TV input jack
   For connecting to a TV with an optical cable (p.6).

9 BD/DVD input jack
   For connecting to a playback device, such as a Blu-ray Disc (BD) player, with an optical cable.

10 COAXIAL input jack
   For connecting an external device with a coaxial digital cable (p.7).

11 ANALOG input jacks
   For connecting an external device with an RCA stereo cable (p.7).

12 IR flasher for TV Remote Repeater
   Transmits TV’s remote control signals received at the remote control sensor to the TV (p.14).

13 Dual built-in subwoofers
   The built-in subwoofers are located in the bottom part of the sound bar.
Installation

Place the sound bar on a flat surface such as on top of a TV cabinet.

Removing the stands
When the sound bar blocks the view of the lower part of the TV screen or the remote control sensor of the TV, remove the stands (18 mm [3/4”]) of the sound bar to adjust its height.

HINT
• Use the TV Remote Repeater function (p.14) to transmit TV's remote control signals via the sound bar.

NOTE
• Keep the stands and screws in a safe place for future use.

Attaching the sound bar to a wall

How to install on the wall
1 Attach the mounting template on a wall and mark for the screw holes.

Tapes or thumbtacks
Mounting template (supplied)

2 Remove the mounting template from the wall, then install commercially available screws and supplied spacers (as illustrated below) at the points marked on the wall.

Spacer (supplied)

3 Hang the sound bar on the screws.

Cautions
• Do not place the sound bar on/under any other devices such as BD player in a pile. Doing so may cause a malfunction due to vibrations.
• Do not touch the grilles (fabric parts) on the front of the sound bar.
• The sound bar contains acoustic suspension speakers. Do not place magnetically sensitive items (hard disk drive, etc.) near the sound bar.
• Depending on your installation environment, it may be better to connect the sound bar and external devices (such as a TV) before installing the sound bar.
• Do not place the sound bar within 50 mm (2”) of the TV. The wall mount brackets on the rear panel can be removed as necessary.

Cautions
• When installing the sound bar on a wall, all installation work must be performed by a qualified contractor or dealer. The customer must never attempt to perform this installation work. Improper or inadequate installation could cause the sound bar to fail, resulting in personal injury.
• Do not attach the sound bar to a wall that is made of weak materials such as plaster or veneered woods. Doing so may cause the sound bar to fail.
• Make sure you use commercially available screws that can support the weight of the installation (specified in Step 2 on the right). Using clamps other than specified screws, such as short screws, nails, and two-sided tape, may cause the sound bar to fail.

Cautions
• Fix the cables in place where they will not become loose. If your foot or hand accidentally gets caught on a loose cable, the sound bar may fall.
• Check that the sound bar is fixed securely after the installation. Yamaha will bear no responsibility for any accidents caused by improper installations.
Connections

Connect to a TV (or other peripheral device).

**CAUTIONS**
- Do not connect the power cable of the sound bar to the AC wall outlet before making connections.
- Do not use excessive force when inserting the cable plug. Doing so may damage the cable plug or AC wall outlet.

1. **Connect the TV and sound bar with the optical cable (supplied).**
   Remove the cap of the optical cable and check the direction of the plug.

2. **Connect the power cable of the sound bar to an AC wall outlet.**

3. **Set the TV as follows.**
   - Set the TV volume to minimum.
   - Disable the TV built-in speaker output (if available).

**HINT**
- If a setting to disable the speaker output is not available on your TV, you may disable it by connecting headphones to the headphone jack on the TV. For details, refer to the manuals of the TV.
- The TV, BD/DVD and COAXIAL input jacks support the following audio signals.
  - PCM (2 channel)
  - Dolby Digital (up to 5.1 channel)
  - DTS Digital Surround (up to 5.1 channel)

**HINT**
- In the following cases, connect the optical output of the playback device to the BD/DVD input of the sound bar with an optical cable (commercially available), then select the BD/DVD key on the remote control for the input source.
  - The TV does not have an optical output.
  - The TV does not output audio (or outputs low volume audio) from the connected playback device.
  - The audio from the playback device connected to the TV cannot be heard as surround sound.

---

1. **Connect the TV and sound bar with the optical cable (supplied).**
   Remove the cap of the optical cable and check the direction of the plug.

2. **Connect the power cable of the sound bar to an AC wall outlet.**

3. **Set the TV as follows.**
   - Set the TV volume to minimum.
   - Disable the TV built-in speaker output (if available).
Analog connection of an external device (game console)
You can connect an external device, such as a game console or TV that does not have an optical output, to the ANALOG input jacks of the sound bar.

**NOTE**
- Make sure the left (L) and right (R) channels are connected correctly.
- Select the ANALOG key on the remote control for the input source.

Digital connection of an external device
You can connect an external device that has a coaxial digital audio output, such as a DVD player, to the COAXIAL input jack of the sound bar.

**NOTE**
- Select the COAXIAL key on the remote control for the input source.
Operations

Preparing the remote control
Peel off the protection sheet before use.

Operating range of the remote control
Remain within the operating range shown below.

Indicators
The indicators on the front panel flash or light up, to indicate the operation and setting status.

Input keys
Select an input source to be played back.
TV .................. TV audio
BD/DVD.......... Audio from a device connected to the BD/DVD input jack
COAXIAL........ Audio from a device connected to the COAXIAL input jack
ANALOG......... Audio from a device connected to the ANALOG input jack
BLUETOOTH (YAS-103 only) ........ Audio from a Bluetooth connected device

The indicator for the selected input source lights up.
(Example: when TV is selected)

HINT
• To play audio of the playback device connected to the TV or to watch videos of the playback device, set the TV’s input source to the playback device.
• For details on Bluetooth connection, refer to “Listening to the sound from a Bluetooth device (YAS-103 only)” (p.10).

SUBWOOFER keys (+/-)
Adjust the volume of the subwoofer.
Volume down (–) Volume up (+)

VOLUME keys (+/-)
Adjust the volume of the sound bar.
Volume down (–) Volume up (+)

LEARN key∗
Sets the sound bar to the TV’s remote control learning mode (p.12).

REPEATER key∗
Enables/disables the TV Remote Repeater function (p.14).
Turns on or off (standby) the sound bar.

STATUS
Green (turned on)
Red (Bluetooth standby)
Off (turned off)

**BLUETOOTH STANDBY key**
(YAS-103 only)
Enables/disables the Bluetooth standby mode.
(p.11).

**SURROUND and STEREO keys**
Switch between surround and stereo (2 channel) playback. When surround playback is selected, you can enjoy a realistic sound effect using Yamaha’s exclusive AIR SURROUND XTREME.

**HINT**
• When 2 channel stereo signals are played in surround, the PLII indicator lights up.

**CLEAR VOICE key**
Enables/disables the clear voice function. When this function is enabled, you can enjoy clear voice sounds while watching movies, TV dramas, news programs or sports programs.

**UNIVOLUME key**
Enables/disables the UniVolume function. When this function is enabled, consistent volume is maintained between channels, programs, commercials and sound sources.

**AUDIO DELAY key**
Adjusts the audio delay to synchronize the sound with the video when the video image on the TV may seem delayed with respect to the sound. Follow the procedure below to adjust the audio delay.

1 Hold down AUDIO DELAY for more than 3 seconds.
   The left most indicator flashes.

2 Press SUBWOOFER (+/-) to adjust the audio delay.

3 To finish the adjustment, press AUDIO DELAY.

**Decoder indication**
The sound bar supports the following audio signals. You can check the type of the input audio signal by the color of the indicator.

- Green (Dolby Digital), Red (DTS Digital Surround)
- Off (PCM)

**MUTE key**
Mutes the audio output. Press the key again to unmute.

**HINT**
• The adjustment will be finished automatically if no operations are performed for 20 seconds.
Listening to the sound from a **Bluetooth** device (YAS-103 only)

You can listen to the wireless sound from a Bluetooth device, such as a smartphone or digital music player. See also the operating manual of the Bluetooth device for more details.

Pairing a Bluetooth device with the sound bar

When connecting to a Bluetooth device for the first time, “pairing” between the device and sound bar is required. “Pairing” is necessary for each Bluetooth device you use. Once “pairing” is completed, subsequent connection will be made automatically.

1. Press the BLUETOOTH key on the sound bar’s remote control to select Bluetooth as the input source.
   The BLUETOOTH indicator on the front panel lights up in green.

2. Turn on the Bluetooth compatible device to be paired, and perform pairing.
   The operation varies depending on the device. Refer to the operation manual of the device.

3. Select “YAS-103 Yamaha” in the Bluetooth device list on the device.
   If a passkey (PIN) is required, enter the number “0000”.

Perform the following steps on the Bluetooth device to be connected.

For the first Bluetooth connection

Pairing a Bluetooth device with the sound bar

Playing back audio from a Bluetooth device on the sound bar

For subsequent Bluetooth connection

NOTE

- Perform pairing with the Bluetooth device and sound bar within 10 meters (33 ft) of each other.
- Up to eight Bluetooth devices can be pairing with the sound bar. If a ninth device is paired, the oldest pairing information is deleted.
- If pairing information for a device is deleted, to use that device again, pairing of the device is required again.
- If a Bluetooth device is already connected to the sound bar, terminate that Bluetooth connection, then perform pairing with the new device.
- Refer to “Troubleshooting” (p.15) for troubleshooting Bluetooth connection.
Playing back audio from a Bluetooth device on the sound bar

1. With the sound bar turned on, press the BLUETOOTH key on the sound bar’s remote control to select Bluetooth as the input source.

   The BLUETOOTH indicator on the front panel lights up in green.

2. Turn on the Bluetooth device.

   When Bluetooth connection is made correctly, the BLUETOOTH indicator of the sound bar flashes 3 times.

3. Play back a song on the device.

   ![Bluetooth Device]

   **NOTE**
   - Perform Bluetooth connection with the device and sound bar within 10 meters (33 ft) of each other.
   - It may be necessary to select “YAS-103 Yamaha” in the Bluetooth device list again, in the event that a connection problem occurs. You may have to change the output setting to output audio to the sound bar, depending on the Bluetooth device you are using.
   - Adjust the volume level of the Bluetooth device as required.
   - If a Bluetooth device is already connected to the sound bar, terminate that Bluetooth connection, then connect with the new device.

Terminating Bluetooth connection

Bluetooth connection is terminated in the following cases. When the Bluetooth connection is terminated, the BLUETOOTH indicator flashes once.

- The Bluetooth compatible device is turned off.
- The BLUETOOTH key on the sound bar’s remote control is pressed for more than 3 seconds.
- The sound bar is turned off.

Using the Bluetooth standby mode

The Bluetooth standby mode allows you to turn on (or off) the sound bar automatically, that interlocked by the operation of the Bluetooth device.

How to set

With the sound bar turned on, hold down the BLUETOOTH STANDBY key on the sound bar’s remote control for more than 3 seconds.

Holding down the BLUETOOTH STANDBY key for 3 seconds each time toggles the mode between enabled and disabled.

- Flash 3 times (enabled), flash once (disabled)

When the Bluetooth standby mode is enabled and the sound bar is turned off, the STATUS indicator lights up in red.

- Lights up (red)

Functions available on Bluetooth devices with Bluetooth standby mode enabled

**Power on interlock function (when the sound bar is turned off)**

When Bluetooth connection is made on the device, the sound bar will turn on and will be ready to play back sound from the device.

**Power off interlock function (when the sound bar is turned on)**

The sound bar will be turned off when Bluetooth connection is terminated on a Bluetooth device. (Only when BLUETOOTH is selected as the input source.)

Using the HOME THEATER CONTROLLER application

By installing the dedicated free application “HOME THEATER CONTROLLER” to a Bluetooth device, such as a smartphone, you can perform various operations easily and conveniently with the Bluetooth device. (Setting items: basic operation, sound-field, sound adjustments)

For details on “HOME THEATER CONTROLLER”, see the product information on our website.
Programming the sound bar with the TV’s remote control (TV’s remote control learning function)

Once you program the sound bar, you can control it with your TV’s remote control for functions such as turning on/off the TV and sound bar simultaneously, or volume up/down and muting/unmuting of the sound bar.

1 Turn off the TV.
2 Turn off the sound bar.
3 Hold down the LEARN key on the sound bar’s remote control for more than 3 seconds to set the sound bar to the learning mode.

When the sound bar is in the learning mode, the indicators on the front panel flash as shown below.

4 Teach the sound bar the “Mute” code of the TV’s remote control.
4-1 Press INPUT on the front panel of the sound bar.

4-2 While pointing your TV’s remote control at the remote control sensor, hold down the mute key for more than 1 second twice or three times.

Result | Bleep/buzzer | Indicators
--- | --- | ---
Successfully learned | Once | Lights up
Failed to learn | Twice | Flash

NOTE
- This function is available only when your TV’s remote control uses IR (infrared) signal.
- An RF (Radio Frequency) remote control will not work.
- If you want to use a cable or satellite set top box’s remote control to operate the sound bar, use your original TV’s IR (infrared) remote control to program the sound bar, then use the set top box’s remote control to operate.
- If by changing the volume of the sound bar the TV’s volume also changes, set the TV’s volume to minimum, or disable speaker output.

5 Teach the sound bar the “Volume (–)” code of the TV’s remote control.
5-1 Press VOLUME (–) on the front panel of the sound bar.

5-2 While pointing your TV’s remote control at the remote control sensor, hold down the volume (–) key for more than 1 second twice or three times.

Result | Bleep/buzzer | Indicators
--- | --- | ---
Successfully learned | Once | Lights up
Failed to learn | Twice | Flash

NOTE
- Steps 4 to 7 require only the TV’s remote control and the keys on the front panel of the sound bar. The remote control of the sound bar is not necessary.
- If the sound bar has already learned functions, the following indicator light up.
  - Mute: BD/DVD
  - Volume (–): COAXIAL
  - Volume (+): ANALOG
  - Power: BLUETOOTH

Approx. 30 cm (1 ft)
6 Teach the sound bar the “Volume (+)” code of the TV’s remote control.
6-1 Press VOLUME (+) on the front panel of the sound bar.

6-2 While pointing your TV’s remote control at the remote control sensor, hold down the volume (+) key for more than 1 second twice or three times.

<table>

<td>Once</td>
<td>○ ○ ○ ○ ○ ○ ○ ○ ○ ○ ○ ○</td>
</tr>
<tr>
<td>Failed to learn</td>
<td>Twice</td>
<td>○ ○ ○ ○ ○ ○ ○ ○ ○ ○ ○ ○</td>
</tr>
</tbody>
</table>

7 Teach the sound bar the “Power” code of the TV’s remote control.
7-1 Press (power) on the front panel of the sound bar.

7-2 While pointing your TV’s remote control at the remote control sensor, hold down the power key for more than 1 second twice or three times.

</tr>
</tbody>
</table>

8 To finish the learning mode, press the LEARN key on the sound bar’s remote control.

This completes the necessary settings. Now you can operate the sound bar with the TV’s remote control’s mute key, volume keys, or power key.

**HINT**
- The learning mode will be finished automatically if no operations are performed for 5 minutes.
- Set the TV volume to minimum. When you turn up the volume of the sound bar with the TV’s remote control, the volume of the TV may be turned up at the same time. In this case, follow Step 3 in “Connections” (p.6) to change the TV setting.
- You can press the (power) key on the sound bar’s remote control to finish leaning mode.

---

**Clearing all programmed functions**

1 With the sound bar turned off, hold down the LEARN key on the sound bar’s remote control for more than 3 seconds. (for entering the learning mode)

When the sound bar is in the learning mode, the indicators on the front panel flash as shown below.

![Indicators](image)

2 Hold down INPUT on the front panel of the sound bar for more than 3 seconds.

If the clearing is completed, you will hear the bleep sound three times.

3 Press the LEARN key on the sound bar’s remote control.
Sending the TV’s remote signal through the sound bar (TV Remote Repeater function)

When the TV Remote Repeater function is enabled, the sound bar relays the TV’s remote signal received by the front sensor to the rear transmitter. This function should be enabled when you place the sound bar in front of your TV and you cannot operate your TV with the TV’s remote control.

**NOTE**
- This function is available only when your TV’s remote control uses infrared signals.

1. Turn on the sound bar.
2. Hold down the REPEATER key on the sound bar’s remote control for more than 3 seconds to enable/disable the TV Remote Repeater function.

This completes the necessary settings. When the TV Remote Repeater function is enabled, you can operate your TV from the TV’s remote control via the sound bar.

**HINT**
- The TV Remote Repeater function is disabled by default.
- If the power cable of the sound bar is connected to an AC wall outlet and when the TV Remote Repeater function is enabled, the function is usable even when the sound bar is turned off.
- If you have made the sound bar learn the volume (+) operation (p.13), the volume of the TV may be turned up when you turn up the volume of the sound bar with the TV’s remote control. In this case, follow Step 3 in “Connections” (p.6) to change the TV setting.
- You can check the status of the TV Remote Repeater function by the center indicator when turning on the sound bar.

Setting the auto power standby function

By enabling the auto power standby function, you can avoid forgetting to turn off the sound bar after use, or if you fall asleep while watching TV.

**NOTE**
- When the auto power standby function is enabled and one of the following conditions is met, the sound bar will automatically turn off.
  - No operations for 8 hours
  - No audio input and no operations for 20 minutes when BLUETOOTH is selected as the input source.

1. With the sound bar turned off, hold down the MUTE key on the sound bar’s remote control for more than 3 seconds.

You can check the status of the auto power standby function when turning on the sound bar.

**HINT**
- Initial setting varies depending on the country or region.
  - U.K. and Europe models: enabled
  - Other models: disabled

Initializing the sound bar

Follow the procedure below to initialize the sound bar.

1. Turn off the sound bar.
2. Hold down (power) on the front panel of the sound bar for more than 3 seconds.
Troubleshooting

Refer to the table below when the sound bar does not function properly. If the problem you are experiencing is not listed below or if the instructions below do not help, turn off the sound bar, disconnect the power cable, and contact the nearest authorized Yamaha dealer or service center.

First, check the following:
1. The power cables of the sound bar, TV and playback devices (such as BD players) are connected to AC wall outlets securely.
2. The sound bar, TV and playback devices (such as BD players) are turned on.
3. The connectors of each cable are securely inserted in to jacks on each device.

<tbody>
<tr>
<td>The sound bar cannot be controlled using the remote control.</td>
<td>The sound bar is out of the operating range.</td>
<td>Use the remote control within the operating range (p.8).</td>
</tr>
<tr>
<td></td>
<td>The batteries are weak.</td>
<td>Replace with new batteries (p.8).</td>
</tr>
<tr>
<td></td>
<td>The remote control sensor of the sound bar is exposed to direct sunlight or strong lighting.</td>
<td>Adjust the lighting angle, or reposition the sound bar.</td>
</tr>
<tr>
<td>The TV cannot be controlled using the TV’s remote control.</td>
<td>The remote control sensor of the TV is blocked by the sound bar.</td>
<td>Use the TV Remote Repeater function (p.14) or remove the stands of the sound bar so that the TV’s remote control sensor is not blocked (p.5).</td>
</tr>
<tr>
<td></td>
<td>There may be any problem with the TV or TV’s remote control.</td>
<td>Refer to the manuals of the TV.</td>
</tr>
<tr>
<td>The TV cannot be controlled by using the TV Remote Repeater function.</td>
<td>The TV Remote Repeater function is disabled.</td>
<td>Enable the TV Remote Repeater function (p.14).</td>
</tr>
<tr>
<td></td>
<td>The TV’s remote control does not use infrared signals. (Some remote controls may not work even if it uses infrared signals.)</td>
<td>The TV Remote Repeater function cannot be used in this case. Adjust the position of the sound bar so that the remote control sensor of the TV is not blocked by the sound bar and use the TV’s remote control to operate the TV.</td>
</tr>
<tr>
<td></td>
<td>The sound bar and TV are too close or too far from one another.</td>
<td>Move the sound bar away from the TV more than 50 mm (2”) (p.5). If necessary, remove or attach the stands of the sound bar to adjust height for the IR flasher (for TV Remote Repeater) of the sound bar positioning in front of the remote control sensor of the TV (p.5).</td>
</tr>
<tr>
<td></td>
<td>There is any obstacle (such as cables) between the sound bar and TV.</td>
<td>Remove the obstacle between the sound bar and TV.</td>
</tr>
<tr>
<td></td>
<td>TV is not receiving the remote control signal well since the signals from the TV’s remote control and IR flasher (for TV Remote Repeater) of the sound bar are interfering.</td>
<td>Disable the TV Remote Repeater function (p.14).</td>
</tr>
<tr>
<td>The sound bar does not learn TV’s remote control operations.</td>
<td>The TV’s remote control key was not held down long enough.</td>
<td>Hold down the key for more than 1 second twice or three times (p.12).</td>

The following description applies to YAS-103 only.

Bluetooth

• Bluetooth is a technology for wireless communication between devices within an area of about 10 meters (33 ft) employing the 2.4 GHz frequency band, a band which can be used without a license.

Handling Bluetooth communications

• The 2.4 GHz band used by Bluetooth compatible devices is a radio band shared by many types of equipment. While Bluetooth compatible devices use a technology minimizing the influence of other components using the same radio band, such influence may reduce the speed or distance of communications and in some cases interrupt communications.

• The speed of signal transfer and the distance at which communications is possible differs according to the distance between the communicating devices, the presence of obstacles, radio wave conditions and type of equipment.

• Yamaha does not guarantee all wireless connections between this unit and devices compatible with Bluetooth function.

Information for Users on Collection and Disposal of Old Equipment and Used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

[Information on Disposal in other Countries outside the European Union]

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):
This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
